TRUSTED & DEPENDABLE WARNING FOR FIREHOUSE APPLICATIONS

ACTIVATION CONTROLS

Our Firehouse Sirens can be activated in any number of ways:

- Landline
- VHF High and UHF Narrow-Band frequencies
- MOSCAD/ACE
- FSK
- Two-tone sequential

Our VHF High and UHF siren activation control packages include the following:

- | | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> ■ Radio ■ Radio interface ■ Tone or digital squelch ■ 3-5 dB gain omni-directional antenna with bracket | <ul style="list-style-type: none"> ■ 35' (10.67 m) of RG58 antenna cable ■ Polyphaser ■ SI TEST |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|

Other features are dependent upon one or two-way controls. Whelen equipment can be interfaced with many different types of two-way radio communications products and systems, from ACE, MOSCAD and FSK.

The following is available as standard options. **BOLD BLACK** in callout indicates the Whelen Model:
